ONETAPTRADE

PLATFORM DISCLAIMER (Standalone Page + Reusable Blocks)

Last Updated: 27 July 2026 | Version 3.1

Full Disclaimer

OneTapTrade is an **automated trading technology platform** operated by **ZAD Ventures FZE**, a UAE free zone establishment (Licence No. 4426544.01). The Platform provides software that allows you to build, configure and deploy automated trading strategies ("Bots"), and to connect those Bots to a brokerage or exchange account held in your own name.

What this means in practice: once you connect an account and activate a Bot, orders are transmitted to that account automatically, without asking you to confirm each one. Orders may be generated at any time the market is open, including while you are asleep or offline.

We are not a broker, dealer, exchange, custodian, investment adviser, portfolio manager or asset manager, and we are not licensed or registered as any of these with the UAE Securities and Commodities Authority, the Central Bank of the UAE, the DFSA, the FSRA (ADGM), VARA, SEBI (India), or any other financial regulatory authority. We provide technology and connectivity.

We do not hold your money. We never receive, hold, control or have the ability to withdraw your funds or assets. We connect using a trading credential — on MetaTrader, your master password — which can place orders but cannot move funds; withdrawals are made only through your own broker's portal, which we cannot access. Your capital stays in your own brokerage account with your own broker, under an agreement between you and them to which we are not a party. All orders are executed, priced, margined and settled by your broker, not by us.

"Automated" does not mean hands-free. Automation means orders are transmitted to your account without you confirming each one. It does not mean the Platform supervises your account for you. Bots do not pause themselves for economic releases, central bank announcements, earnings or unscheduled news — they trade through them on their ordinary logic. Monitoring the calendar and the market, and pausing or disabling a Bot when conditions call for it, remains your responsibility.

We do not assess suitability. No one at OneTapTrade has evaluated whether automated trading, any particular Bot, any instrument, or any level of leverage is appropriate for your financial situation, objectives, experience or risk tolerance. The availability of a Bot on the Platform is not a recommendation to use it.

Automated trading carries a high risk of loss. A Bot can lose money rapidly, repeatedly, and while unattended. Software can malfunction. Strategies that performed well historically can fail without warning when market conditions change. Stop-loss and other risk conditions are instructions, not guarantees, and may not execute at the intended price in gapping, illiquid or

halted markets. **You can lose all of the capital in your connected account, and more than you deposited where leverage and your broker's terms permit it.**

Backtested and simulated results are hypothetical. They are produced with hindsight, carry no financial risk, and cannot reproduce slippage, latency, order rejection or liquidity constraints. Live results will differ, and may differ substantially and adversely. Past performance, live or modelled, does not guarantee future results.

Testimonials are individual experiences. Any testimonial, case study or user result shown on the Platform describes one person's experience. It is not representative of results generally and is not a guarantee of anything.

Pre-release features are experimental. Anything labelled beta, early access or preview is incomplete, may behave unpredictably, and should not be trusted with capital you are unwilling to lose in full.

Bots created by other users are not reviewed by us. We do not audit, validate or endorse user-created strategies or any performance claims made about them.

Activating a Bot does not transfer responsibility to us. You remain responsible for monitoring your account, your open positions and your margin. Deactivating a Bot, changing your password at your broker or cancelling your subscription stops future orders only — **open positions remain open and remain yours to manage.**

ZAD Ventures FZE, its shareholders, directors and employees accept no liability for trading losses or for any loss arising from use of the Platform, to the maximum extent permitted by law, as set out in the Terms of Service.

Block A — Site-Wide Footer (every page)

> OneTapTrade is a product of ZAD Ventures FZE (UAE). We provide automated trading technology, not investment advice, and we are not registered with any financial regulator. We hold no client funds. Automated trading carries a high risk of loss — you can lose all of your capital. Past and backtested performance does not predict future results. [Terms] · [Privacy] · [Risk Disclosure] · [Refunds]

Block B — Bot, Signal & Analysis Attachment (every Bot listing, signal, analysis and alert)

> Technology only — not investment advice or a recommendation, and no suitability assessment has been made. Automated trading carries a high risk of loss. Stops are not guaranteed.

ONETAPTRADE

Block C — Video & Social Disclosure (spoken and on-screen, first 5 seconds)

"OneTapTrade provides automated trading software, not investment advice. Trading bots can lose money fast, including while you're not watching. You can lose everything you put in. Do your own research."

Block D — Activation Disclosure (at Trading Authorization, and on Bot performance displays)

Automated trading carries a high risk of loss. Bots transmit orders to your own brokerage account without confirming each order with you, and can lose money rapidly while unattended. Stops are not guaranteed. Past and backtested performance does not predict future results. OneTapTrade provides technology only, holds no client funds, and does not assess suitability. You can lose all of your capital, and more where leverage permits.

Block E — Performance Figure Label (beside every published return, win rate or drawdown figure)

[LIVE / BACKTESTED] result for [period], [instrument set], [starting capital]. Costs [included / excluded]. Not a prediction of future performance. Your results will differ.

Block F — Marketing Copy Rule (internal standard, applies to every ad, landing page and post)

Never write or imply: guaranteed, risk-free, safe, passive income, set-and-forget, hands-free, can't lose, or any specific return. Where the word "automated" is used, the page must also carry Block A or Block B. Every performance figure carries Block E.
